

Dear FCC I strongly oppose the NAB's attempt to limit what XM Radio
airs,I pay XM a monthly service charge to hear what I want to hear not what they
think I want. The NAB cannot compete with what I pay to receive,just like I pay
for satillite tv to see what I want,If local radio and tv were on the ball they
would have seen the light and gave us what we wanted but they are only
interested in the bottom line paid by advvertisers,not the listeners and
viewers. Once again I PAY FOR XM RADIO and DIRECT TV I EXPECT TO HEAR AND SEE
WHAT I WANT. Regular broadcasters cannot give me the total freedom of choice or
provide the indepth traffic and weather information I want and need,if I as a
subscriber of Direct tv can access the weather channel on their system then why
not can I receive it as well on XM Radio along with the local traffic and
weather in detail from a city of my choosing as a subscriber to XM Radio I pay
for service and XM Radio DELIVERS .

Thank you, Daniel Cerwin
